# Block the Date!

- ATRC, an ABM initiative organised by Tyre Asia, is a biennial event dedicated exclusively to tyre makers and those who serve tyre and rubber industries in its various segments.
- The track record is a matter of pride. Four big-hit editions and now on to the fifth. The focus on sustainable technology in tyre manufacturing process makes ATRC unique in its conception and aim.
- The way automation driven by artificial intelligence has redefined the industry, enhancing quality and profitability. The theme of ATRC 2019 Automation Technology – Future Reality in Manufacturing shows where it is heading to in future.
- The emphasis is on building an outstanding conference programme that provides a real-world experience and solutions. The speakers and presentations are most diligently chosen.

## Share ideas, engage in networking

The two-day conference combines dedicated special presentations, keynote addresses and panel discussions. It presents the most ideal platform to share ideas and engage in networking opportunity unrivaled within the tyre manufacturing sector in Asia.

## Who should attend?

- Chairman
- CEO
- COO
- Account Managers
- R&D Heads
- Senior Executives
- Purchase Heads
- MD
- Technical Heads
- Consultants
- Scientists
- Business Directors
- Engineers etc...

**Glimpses  
of ATRC**

# Testimonials

## **Satish Sharma, President – APMEA, Apollo Tyres, India**

This conference comes at a very interesting time when the industry is in the cusp of technological changes and when India is growing at a good pace. The growth environment is positive and pushing the industry towards a more sustainable future. In this backdrop, ATRC is very well themed and times. We welcome it. It is a great initiative. I hope the deliberations provide good food for thought.

## **VK Misra, Technical Director, JK Tyre, India**

In this environment of industrial growth, particularly the growth in the automobile sector, technology has to and will play a very major role. R&D focus is now more on future technology, like automation. This trend has to continue. In this, conferences like ATRC play a major role in spreading new information and knowledge and also enabling interaction between experts from all over the world and work together to show the way forward.

## **Erich Nesselhauf, MD & CEO, Daimler India Commercial Vehicles**

I am quite excited to attend ATRC. It has brought together an international audience. This is a good forum to know more about the competitiveness in the tyre and rubber business and what can be done for the Indian and global markets.

## **PK Mohamed, Chief Advisor, R&D, Apollo Tyres, India**

The conference and its overall arrangements were good. The speakers and papers were of high standard, especially Peter Haan (Siemens), Riaan Diener (VMI) and Dr. Mohamed Hassan (Mesnac Americas).

## **Dr. Ashoke Karmokar, Bridgestone, Japan**

ATRC 2017 was excellent with good speakers and papers. Presentations by Rajiv Budhreja (ATMA) and Dr. Gerard Nijman of HF Group were noteworthy. It would be good to see ATRC as a global level event for information exchange on the tyre and rubber industry like the Tire Technology Expo

## **Riaan Diener, Manager, VMI Group, Holland**

This is my first time at ATRC and it's quite a positive and refreshing experience. I would rate it as excellent. The address by Eric Nesselhauf of Daimler India and presentations by Mike Norman of VMI and Pradeep Kumar of Apollo Tyres were interesting.
